

**SunFrame® contributes to Solar Decathlon winning entry by University of Colorado**

**ALBUQUERQUE, NEW MEXICO, October 15, 2005** — The University of Colorado again used a UniRac mounting product when it successfully defended its title at the U.S. Department of Energy's Solar Decathlon.

U.S. Energy Secretary Samuel Bodman announced Oct. 14 that the university had taken overall honors in the second Solar Decathlon on the National Mall. Its winning entry incorporated SunFrame, a UniRac system designed for superior aesthetics.

The university won the same honor at the first Decathlon in 2002. On that occasion, its entry used UniRac's versatile SolarMount system.

Among the eleven teams that employed commercial mounting systems, seven used UniRac products.

The 2005 Solar Decathlon drew eighteen collegiate teams in a competition to design, build, and operate the most attractive, energy-efficient solar-powered home.
