

UniRac Announces Alliance with Wiley Electronics to Expand Technology Offering

ALBUQUERQUE, NEW MEXICO, January 8, 2008 — UniRac Inc., North America's leading manufacturer of solar photovoltaic (PV) mounting architecture, is pleased to announce their expanded relationship with solar electronics expert Wiley Electronics LLC, which will enhance UniRac's technology offering for solar installers.

As part of this alliance, UniRac and Wiley Electronics will work closely together to deliver best-of-breed innovations in solar PV grounding, wire management, and electronics-related mounting technology, leveraging the expertise of each company in order to provide installers with industry-leading solar mounting architecture.

"Wiley Electronics is well-respected by installers in the solar industry. They are innovative and provide the solutions that solar installers are looking for. We are excited to leverage their expertise, in order to provide our customers with the most technologically advanced, highest-quality solutions on the market today," said Douglas May, UniRac CEO.

The first technology from this alliance is the WEEB 9.5, an integral grounding solution accessory that is now offered with the RapidRac G10, which was launched in September 2007 at the Solar Power Conference. The RapidRac solution is one of the fastest, simplest and most cost-effective mounting architectures for commercial flat roof installations. The WEEB 9.5 offers installers the ability to have a grounded array with minimal extra labor or wiring.

As part of this ongoing relationship, this alliance will focus on the following areas:

- Expanding UniRac's product family of grounding solutions
- Wire management
- Electronics safety management
- Module security

"The management and engineers at UniRac have a clear focus on how to meet the growing demands of the solar industry. Wiley Electronics is pleased to contribute with our own part to what is going to be a tremendously successful enterprise," said Brian Wiley, President of Wiley Electronics.

The RapidRac G10, complete with the WEEB 9.5 solution, is available to purchase today from UniRac's distribution network, http://www.unirac.com/unirac/uni_pdf/distrib.pdf.

About Wiley Electronics

Wiley Electronics (www.we-llc.com) designs and manufactures products for the advancement of clean, renewable sources of energy. With products designed specifically for the renewable energy industry, such as the WEEB Grounding Clip, the ASSET, and the Acme Cable Clip, Wiley Electronics enables their customers to install PV systems safely, efficiently, less expensively, and with more accuracy.

About UniRac

Based in Albuquerque, New Mexico, UniRac (www.unirac.com) was founded in 1998 and quickly became the industry leader with a reputation for superior products, responsive support and outstanding services. Speed and high-quality installation options are the trademark of all our PV racking product lines. UniRac

delivers innovation, on time, and with award-winning results.
